

Seeding the Future of Clean Energy Innovations

Clean Energy Impact Fund

The Benefunder Clean Energy Impact Fund

CURRENT RESEARCH

Funding today's top university innovators in clean energy

Seeding the future of clean energy innovations through a unique philanthropic funding platform. Building relationships with a national network of top innovators and convening donors to solve our nation's biggest energy issues. Our strategy is to diversify resources to a wide range of top clean energy researchers on the Benefunder platform, with equal periodic distributions to all researchers in the fund, in exchange for regular updates.

The Clean Energy Impact Fund will focus on advancing all areas of clean energy, including basic and applied research, with an emphasis on commercializing new methods and technologies. Benefunder's Clean Energy innovators include some of the top labs in the country, including Harvard, Duke, Cornell, The University of Texas at Austin, Rice, and Georgia Tech. They include promising new breakthroughs in power production, storage, and delivery, as well as policy. Opportunities for funding these initiatives will span early-stage research through commercialization, and early stage debt and equity positions in promising technologies that might be too risky or early for more traditional funding. We plan on allocating 15% of total fund assets of clean energy impact investing.

The fund will include these top university innovators from accross the nation working on today's most pressing clean energy solutions:

RENEWABLE ENERGY TECHNOLOGIES

FUNDING REQUEST

The Clean Energy Impact Fund will ensure that dontions will reach their intended target - the top innovators in this field of study. By supporting this fund, at any level, you are maximizing your dollars to this research over time, balancing cash flow while providing accountability. With a target gift size of \$200K per researcher, distributed quarterly, Benefunder hopes to create the largest Clean Energy Impact Fund available on both a public and private platform.

*Donors can donate any size amount to the fund.
