

Propelling Innovation: Guiding Innovators from the Laboratory to the Marketplace

VON LIEBIG
ENTREPRENEURISM CENTER

von Liebig Entrepreneurism Center

CURRENT RESEARCH

Translation of university discoveries into products that benefit society

Academic research poised to benefit the world seldom makes it out of the lab and into the marketplace. In part, this is because technologies developed in university research labs are not market-ready; their value is unknown, the business model is unclear, and they lack an experienced business management team to commercialize the technology. The von Liebig Entrepreneurism Center at the University of California, San Diego bridges the gap between industry and academia, by providing business mentorship, entrepreneurial education and gap funding that help innovators move their discoveries to the marketplace. Led by Senior Executive Director Dr. Rosibel Ochoa and supported by a team of Technology and Business Advisors, The Center guides the innovators through the early stages of the commercialization process.

Through a combination of business mentoring, proof-of-concept grants, and experiential entrepreneurial education, the von Liebig Entrepreneurism Center has supported more than 200 innovator teams including faculty, students and staff, and assisted in the launch of more than 53 university-affiliated startup companies. Its vision holds steadfast onto training the next generation of entrepreneurial technology leaders, equipping them with the necessary tools to become more effective contributors as they join innovative technological companies. Overall, more than 1000 students have attended the von Liebig Center courses, and the enriching programs at the Center continue to evolve. Partnering with universities and organizations worldwide in Korea, Japan and Latin America, the Center has adapted its methodology to provide training and mentorship to innovators around the world, demonstrating...
